

Agentic AI Leadership

24 April 2026 10:00 AM - 24 April 2026 05:00 PM

Brief Overview:

MMA's Flagship Workshop - Agentic AI Leadership

Date : 24-04-2026, Friday

Time : 10:00 AM - 5:00 PM.

Venue : Madras Management Center, Chennai

Agentic AI is not just another wave of automation. It is the shift from tools that assist to systems that act. Organizations that understand this early will design the future. Those that don't will operate inside it.

This immersive leadership program equips decision-makers to understand, envision, and act on Agentic AI — strategically, responsibly, and immediately.

This is not a technology training. It is a strategic enablement program — designed to help leaders think, decide, and act on Agentic AI. This session focuses on Understand, envision & decide.

Session content:

- Agentic AI is not just another wave of automation. It is the shift from tools that assist to systems that act. Organizations that understand this early will design the future. Those that don't will operate inside it.

This immersive leadership program equips decision-makers to understand, envision, and act on Agentic AI — strategically, responsibly, and immediately.

This is not a technology training. It is a strategic enablement program — designed to help leaders think, decide, and act on Agentic AI. This session focuses on Understand, envision & decide.

For Whom:

- Designed for senior professionals who shape direction — not just implementation:
 - CXOs and Business Leaders
 - Digital & Transformation Heads
 - Product Architects and Senior Program Managers
 - Functional Leaders (HR, Finance, Operations, etc.)
 - Innovation and Strategy Leaders
 - Decision-makers evaluating AI adoption

No technical background required (There is nothing technical but will enable audience to make technical decisions)

Key Takeaways:

By the end of the day, participants will be able to:

- Clearly distinguish Agentic AI from previous AI waves
 - Identify high-value use cases within their own function
 - Understand how AI agents think, decide, and act
 - Evaluate risks, governance needs, and implementation challenges
 - Define a realistic adoption roadmap for their organization
 - Move from “AI curiosity” to “AI strategy”
-
