

Just-In-Time procurement and optimizing inventory

12 August 2022 09:30 AM - 12 August 2022 05:00 PM

Brief Overview:

Just-in-time(JIT) has been a well known success tool and competitive strategy for many manufacturing companies and product oriented businesses.

With the application of JIT practices, such companies are able to enforce lean manufacturing in their operations and to leverage their product portfolio.

JIT has now been considered an universal mantra to face operational challenges and supply chain bottlenecks.

Applying JIT principles will facilitate reduction of delivery leadtime and resource optimisation in manufacturing operations.

Session content:

- Basic principles of JIT system
- Operational practice for JIT implementation
- Challenges and roadblocks in JIT as seen in the past
- Facilitating logistics requirements
- Benchmarks and best practices of successful companies
- Upgrading internal preparedness for JIT transition
- JIT related case studies and learning outcomes

For Whom:

- Anyone who is involved in

Managers and Executives from Production department

Managers and Executives from SCM and logistics

Maintenance and Shift Executives

Executives and Supervisors of Stores and Warehouses

Consultants from all functional areas and service industry professionals.

Key Takeaways:

Essential takeaways from this workshop are as follows :

Comprehend JIT as a corporate success strategy
Develop basic skills to adapt and implement JIT in your company
Paving the way for better resource utilisation and working capital
Develop skills and necessary orientation to propagate JIT culture in the company
Impart knowledge on JIT principles and practices to your suppliers and vendors
Bring additional safeguards in the manufacturing and storage areas
